

New Standards Of Date Printing Inspection Machine

EDM that gets the overwhelming support to date printing in the packaging site provides the print inspection machine. The print inspection system that utilizes the know-how of date printing that has been cultivated over the years, and has been developed to the highest priority the ease of use in the packaging site will provide the safe and secure of the date printing.

Specialized In Date Printing

We have built an easy-to-understand the inspection setting flow that tends to be complicated by the combination of the intuitive user interface and the content that specializes in the inspection of date printing. Not only the day-to-day inspection operation, also can be done efficiently test set over the details.

SD Memory Adoption

It has been adopted the SD memory for the storage medium. In addition to perform a read and save the settings at high speed, it can also be re-inspection run during storage or save the image of the inspection NG image.

SPECIFICATION

Model	PCi150
Type	Date Printing Inspection Machine
Inspection Plan	Character Verification Inspection
Camera Specification	Black-and-white 330,000 pixel CCD camera
Image Storage	1,000 sheets (SD card storage)
Power Supply	AC100-230V , 80VA , 50/60Hz
Configuration	Main Body・Monitor・Camera・Strobe
Operating Environment	Temperature : 5°C-40°C Humidity : Under 90%RH (no dew condensation)

The specification may differ from conditions of use.
Specification and other information are subject to change without notice.
